Work experience

14 Oct 2019 –
Knowit Oy - Front-end developer, Helsinki Finland (distance work from Kokkola)
Developed and maintained modern web solutions for leading Nordic brands including Metsä Group, Sanoma, Ensto, Axopar, and Hartwall. Collaborated with multidisciplinary teams to deliver responsive, accessible, and user-focused digital experiences across a variety of customer projects.

30 Oct 2018 – 13 Oct 2019
LindenDesign - Freelance webdesigner/developer, Kokkola Finland
Worked as a freelance consultant for digital agencies while also designing and developing websites for small and medium-sized businesses. Delivered end-to-end web projects for clients including RÄKÄ Clothing, TinkyBell Oy, Taksivene, and others, covering design, front-end development, and client communication.

05 Sep 2011 – 02 Aug 2018
KAN - Front-end developer, Malmö sweden (distance work from Finland starting 2014)
Developed and maintained websites and digital solutions for international clients including Sony Mobile Communications, E.ON, BoKlok, Ikano, and Nestlé. Worked extensively with enterprise CMS platforms such as Episerver (Optimizely) and Adobe Experience Manager (AEM), collaborating closely with designers, developers, and project managers.

08 Mar 2010 - 29 Aug 2011
Dynamic dog - Front-end developer, Malmö sweden
Designed and developed websites for clients including Doro, City Gross, and Hermods. Built responsive and user-friendly web solutions using CMS platforms such as Episerver and Umbraco, contributing throughout the full project lifecycle from design implementation to deployment.

About me

Originally from Malmö, Sweden and now living in Finland, I am a front-end developer and father of two. My professional journey began in the culinary world as a trained chef before a long-standing passion for web development evolved from a hobby into a full-time career.

Creativity has always been a driving force in both my professional and personal life. Outside of development, I enjoy playing guitar and drums, recording my own music, experimenting in the kitchen, and spending time with my family. Whether building user interfaces, writing music, or creating a new recipe, I enjoy combining technical skill with creativity to bring ideas to life.

Personal interests

Family, traveling, listening to music, videogames, watching movies and tv series, rollerblading and biking.

Education

08 Aug 1997 - 01 Jun 2000

Berga gymnasiet - high school, Eslöv Sweden

Chef school - Degree in culinary arts

Social and language skills

- Comfortable working directly with clients, stakeholders, designers, and developers
- Adaptable, approachable, and easy to collaborate with
- Swedish (Native)
- English (Fluent)
- Finnish (I can manage my order at Subway)
